

I fully support the work that XM Satelite Radio is doing to keep me updated on the local weather and traffic information in the DFW area. XM Radio is the first breath of fresh air in the radio business in forever and provides a variety and quality of programing we can't get anywhere else. If the AM-FM stations had been doing their job and keeping up with market conditions, XM would have never been born. But now that it is, it not fair for the "Broadcasters" to decide to their fate.

I RESPECTFULLY URGE YOU TO REJECT NAB PETITION 04-160.

Don't take away a valuable service -- if the broadcasters get their act up to snuff and produce a quality broadcast, they should be able to make it fairly -- not by limiting someone else's business.

America was built on the free enterprise system -- that's what we want, and I will only support those who support that philosophy with my votes. Yes, I am a registered and very active voter.
